Homework

Introduction To Java

1.

```
// The "Testing" class.
import java.awt.*;

public class Testing
{
    public static void main (String[] args)
    {
        /* output line */
        System.out.println("Testing");

    } // main method
} // Testing class
```

Consider the code above,
   a. What is the name of the class?
      Testing

   b. What is the name of the source code file?

   c. What is the name of the class file?
      Testing.class

   d. Mark the beginning and the end of the class.
   e. Mark the beginning and the end of the main method.
   f. Mark the line of comment.
   g. What is the name of the packages that are imported?
      java.awt

   h. What does the program do?
      It prints out Testing on the screen

2. **Output1.java**   Write a program that output your name and your address on separate lines.
